## 👤 PROFESSIONAL SUMMARY

Third-year B.Tech CSE student (CGPA: 9.07) focused on AI/ML, Generative AI, and real-world intelligent systems. Building AI solutions including Journey Bhai and continuously expanding expertise in emerging AI technologies.

## </> Technical Skills

**Expertise:** Python, Machine Learning, Gen AI, Intelligent Systems

## 📁 Experience

### Labmentix

AI/ML Intern

Feb 2026 — Apr 2026

Work from home

- Developed and delivered AI/ML projects using end-to-end machine learning workflows.
- Applied machine learning techniques to real-world problem statements and implemented practical solutions.
- Collaborated remotely, incorporating feedback to improve project development and problem-solving.

## 📁 Projects

### Journey Bhai

Developing Journey Bhai, an AI-powered travel companion designed to provide intelligent, personalized, and adaptive travel assistance. The system generates and evaluates multiple routes based on distance, traffic, safety, and road conditions while adapting recommendations according to user preferences and changing journey conditions. It provides proactive suggestions for restaurants, fuel stations, activities, breaks, and other relevant stops along the route. The system also aims to dynamically recommend better alternatives when conditions change, creating a more efficient, personalized, and stress-free travel experience.

## 📁 Accomplishments

### Highlights

- **Finalist — HackACE 2026**, selected for the final presentation round with *Journey Bhai*, an AI-powered travel companion.
- **Finalist — IEEE ACSS Ideathon 2025**, selected for the final pitching round for an AI-driven solution.
